PROFILE

I'm a React frontend developer with strong creative and analytical skills. I have a keen eye for detail and a deep appreciation for clean layouts, refined design, and engaging interactions. Additionally, I'm aspiring to become a web designer.

SKILLS

- HTML
- CSS
- Javascript
- React
- Sass
- Python
- Git
- Figma

PROJECTS

ENTERTAINMENT WEB APP

I've designed an engaging entertainment web application that, while still in development, allows users to search, bookmark, and discover movies through a dynamic API. Stay tuned for future enhancements that will bring the world of cinema to your fingertips!

DICTIONARY WEB APP

I have developed a comprehensive dictionary web application using a combination of JavaScript, SCSS, and HTML. This feature-rich tool enables users to efficiently search for words while also providing audio pronunciation, enhancing the overall linguistic experience.

PORTFOLIO

I've curated a diverse portfolio showcasing my creative endeavors, from web apps to design projects. Explore my work to get a glimpse of my passion for innovation and design, with more exciting projects on the horizon.
